

EUROGOMMA

Flip-Flow Screening

Flip-flow polyurethane screen mats

EUROGOMMA manufactures polyurethane screen mats fitting every flip-flow or flip-flop screen deck. All our screens are custom designed, made and perforated to respect all requirements of our customers. No difference from OEM parts related to shape, dimensions and structure will happen if not specifically requested.

The use of premier quality polyurethane – **Elasturan 6020** – owning excellent wear resistance, chemical resistance and mechanical properties permit our screen mats to offer long life and excellent screening performances.

Our flip flop screen panels are extensively utilised in the World material handling industry.

Our flip flow screen mats achieve excellent performances when screening sticky and bladed materials like Coke, Coal, Clay, Limestone, Dolomite, Flux, Basalt, Granite, Glass bits, House Waste, Wood, etc.

The reputation and quality of our polyurethane screen mats permit us to cooperate with several machine manufacturers.

These collaborations give us the opportunity to constantly face new challenges in the worst screening situations.
