

# EUROGOMMA

## PURFIL

### *Polyurethane coated wire screen meshes*

**EUROGOMMA** supplies steel wire meshes coated with abrasion resistant polyurethane.

The advantage of this system is to increase the wear life and to offer the same open area and then equivalent screening performance of standard steel wire screens.

This product offers several advantages in comparison with standard steel wire meshes:

- ✓ 3 to 5 times longer wear life
- ✓ identical open area
- ✓ reduction of clogging and sealing thanks to the elasticity of polyurethane
- ✓ easy maintenance due to the low weight
- ✓ noise reduction

Screen panels are available for both cross and long
