

EUROGOMMA

Polyurethane pipe lining

EUROGOMMA supplies an extensive range of polyurethane lined pipes, elbows and fitting. Our lined pipes are suitable to aggressive applications due to abrasive and corrosive slurry. In fact our polyurethane lined pipes have excellent technological characteristics relating to:

- Abrasion resistance
- Hydrolytic stability
- Chemical resistance

Our polyurethane lined pipes are supplied in unit length of 1.000mm, 1.200mm and 1.500mm and we flange them together to get the required total length.

Besides we supply interchangeable polyurethane pipe liners reducing costs and maintenance time.

However this application is suggested to line pipes maximally **4 m** long. In other case application could be difficult and maintenance complicated.
