## *Polyurethane shoes for spiral classifiers*

Our polyurethane shoes for spiral classifiers are considered an excellent solution to decrease wear and consequently maintenance of spiral classifiers.

These are the reasons:

- Our polyurethane shoes have high abrasion resistance – higher than many metal liners
- They are lightweight and their application on screws is simple and fast
- They are all interchangeable
- The peculiar corrosion resistance of our polyurethane permits the trouble-free application of our shoes with slurry containing chemicals.
- Our polyurethane is absolutely non-toxic permitting the application of our shoes in the sugar and salt industry as well as in mining, sand & gravel, glass industry, etc.

Besides all our polyurethane shoes are custom made to perfectly fit in their application.  
A number of Qualities for the complete satisfaction of our Clientele.
