

EURO-PS Polyurethane modular screens

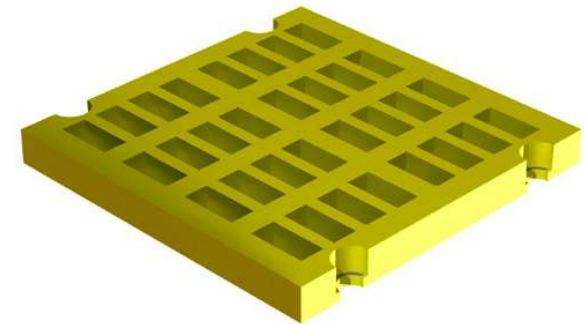

Screening

Fine screening panel

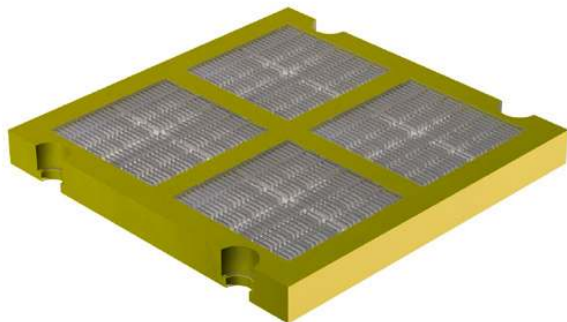

SUPERFLOW screen panel

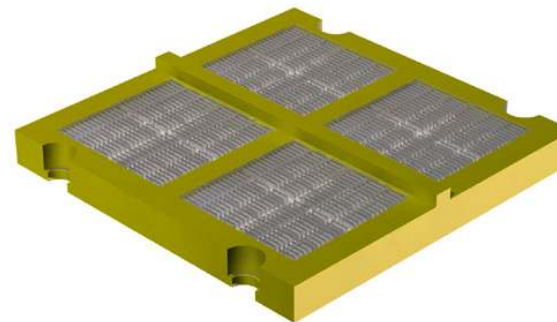

Gross screening panel

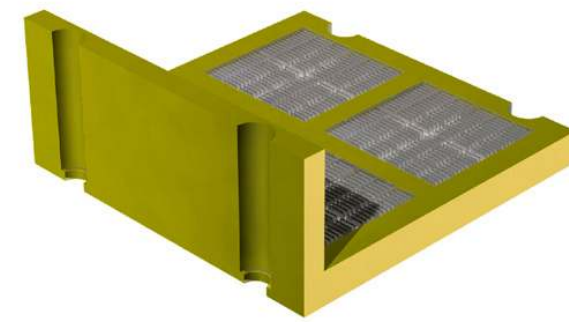

Dewatering

Standard dewatering

Dewatering panel with cross bar

Dewatering panel with weir bar

EURO-PS is the most versatile and modular system of **EUROGOMMA**

Thanks to the standard size 305 x 305mm – 1'x1' of all screening and dewatering modules the installation, maintenance and replacement of the screen deck becomes very easy.

EURO-PS is suitable to all screening and dewatering installations as the modules are designed to offer the highest efficiency and performances.

Standard modules are coupled by special panels with cross bars, weir bars and **SUPERFLOW** apertures to prevent blinding.
