

EUROGOMMA

Polyurethane vulcanised linings & moulded liners for Hydro Cyclones

Our polyurethane vulcanised linings and moulded liners are excellent to prevent wear and abrasion effects in Hydrocyclones.

The combined usage of vulcanised linings and moulded liners offers our Clientele an all-around solution an versatility in application.

Here are the major qualities that we can offer:

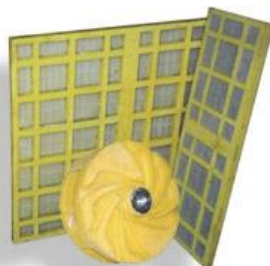

- Superior abrasion resistance and consequent long wear life
- Customised design
- Lightweight construction for fast and easy installation
- High cost effectiveness
- Unlimited applications

We let our customers decide the production method - vulcanising or moulding - even if we usually suggest to choose our vulcanised linings because they need less application of polyurethane and consequently they offer cheaper prices.

Vulcanised liners

Moulded liners

We manufacture **polyurethane pump liners** and **polyurethane dewatering panels** too.

A complete range wear resistant products for your Hydrocyclone
