

# EUROGOMMA

## *Polyurethane sheets with expanded metal mesh*

**EUROGOMMA** manufactures an extensive range of polyurethane sheets with expanded metal mesh. The abrasion and corrosion resistance Quality of our premium Polyurethane are coupled with the structural strength of the expanded metal mesh to secure long lasting applications anyway offering flexible and bendable sheets that can be modelled on complex surfaces.

Our sheets are available in standard formats of  
1x1mt  
1x2mt  
1,25x2,5mt  
1,5x3mt  
and with customised dimensions.

Thickness range goes up from 4mm to 50mm

Our polyurethane sheets are available with an extremely wide range meshes as for metal type (carbon steel, stainless steel, aluminium), mesh size and thickness

Installation is practical and user friendly.

The operator can decide between:

- Bolting through predrilled holes
- Screwing through
- Riveting through
- Welding – *in this case the polyurethane sheet would be inclusive of steel washers where the operator can weld in to attach the expanded metal mesh to supporting structure*
